Knowing New Biotechnologies-Matthias Wienroth 2015-02-20 The areas of personal genomics and citizen science draw on - and bring together - different cultures of producing and managing knowledge and meaning. They also cross local and global boundaries, are subjects and objects of transformation and mobility of research practices, evaluation and multi-stakeholder groups. Thirdly, they draw on logics of 'convergence': new links between, and new kinds of, stakeholders, spaces, knowledge, practices, challenges and opportunities. This themed collection of essays from nationally and internationally leading scholars and commentators advances and widens current debates in Science and Technology Studies and in Science Policy concerning 'converging technologies' by complementing the customary focus on technical aspirations for convergence with the analysis of the practices and logics of scientific, social and cultural knowledge production that constitute contemporary technoscience. In case studies from across the globe, contributors discuss the ways in which science and social order are linked in areas such as direct-to consumer genetic testing and do-it-yourself biotechnologies. Organised into thematic sections, 'Knowing New Biotechnologies' explores: • ways of understanding the dynamics and logics of convergences in emergent biotechnologies • governance and regulatory issues around technoscientific convergences • democratic aspects of converging technologies - lay involvement in scientific research and the co-production of biotechnology and social and cultural knowledge.

The Publishers' Circular and Booksellers' Record of British and Foreign Literature- 1904

Jihadism Transformed-Simon Staffell 2016-12-01 Jihadist narratives have evolved dramatically over the past five years, driven by momentous events in the Middle East and beyond; the death of bin Laden; the rise and ultimate failure of the Arab Spring; and most notably, the rise of the so-called Islamic State. For many years, al-Qaeda pointed to an aspirational future Caliphate as their utopian end goal - one which allowed them to justify their violent excesses in the here and now. Islamic State turned that aspiration into a dystopic reality, and in the process hijacked the jihadist narrative, breathing new life into the global Salafi-Jihadi movement. Despite air-strikes from above, and local disillusionment from below, the new caliphate has stubbornly persisted and has been at the heart of ISIS's growing global appeal. This timely collection of essays examines how jihadist narratives have changed globally, adapting to these turbulent circumstances. Area and thematic specialists consider transitions inside the Middle East and North Africa as well as in South Asia, sub-Saharan Africa and Europe. As these analyses demonstrate, the success of the ISIS narrative has been as much about resonance with local contexts, as it has been about the appeal of the global idea of a tangible and realised caliphate.
